

Reactiv SUITE

**Presentations Re-Imagined.
Teamwork Enabled.
Anywhere.**

RICOH
imagine. change.

TAKE YOUR MEETINGS AND PRESENTATIONS TO A NEW LEVEL

Make meetings and presentations more compelling and less complex—yet shorter and a more valuable use of everyone’s time. **Reactiv SUITE** is an entire ecosystem of software modules and services designed to simplify pre-meeting preparation, enhance in-meeting collaboration, and boost post-meeting productivity. **Reactiv STAGE** is powerful storytelling platform with multiple ways to organize, connect, and present digital content. **Reactiv SCRIBBLE** is the ultimate brainstorming tool; an infinite canvas where your team can ideate with complete freedom and clarity. Together with your favorite video conferencing service, Reactiv SUITE combines the simplicity of writing on paper with the digital ability to remotely share, communicate, and track changes in a dynamic and interactive environment. Seamless integration with **Ricoh Interactive Flat Panel Displays** (IFPDs, also called Interactive Whiteboards) delivers the productivity, collaboration, and creativity to engage employees and audiences wherever they are located.

Excellent for general office environments as well as key vertical markets including education, design, manufacturing, and healthcare, Reactiv SUITE is available in two configurations; one optimized for use with large-scale interactive flat panel displays in public spaces such as conference rooms and classrooms, the other for personal use on a desktop. Both create a seamless experience for all users in any work environment, allowing local and remote meeting participants to collaborate and share documents as if they were sitting across the table.

Reactiv SUITE Designed For Shared Spaces

Reactiv SUITE is designed to visually engage with teams of onsite and remote users in real time. When loaded onto a Ricoh IFPD equipped with a Windows 10-based controller such as a Lenovo ThinkStation, users can take full advantage of Reactiv SUITE screen sharing and document annotation tools. Communicate, collaborate, and present ideas to multiple participants in boardrooms, conference rooms, and classrooms.

Optimized for multi-user, multi-board environments, Reactiv SUITE supports several authentication protocols to facilitate access to data across the corporate network. Authorized employees log in to Active Directory or MS Office 365, and can seamlessly access their virtual workspaces regardless of the physical room and IFPD in use. This allows trusted users full access to their data, while restricting guests to limited access.

KEY FEATURES

- ▶ Multiple users can manipulate and annotate documents simultaneously
- ▶ Supports a wide variety of peripheral devices and file formats for multi-media display
- ▶ Image casting from laptops, mobile devices, and tablets to the IFPD
- ▶ Connect a second flat panel display or projector for synchronized display when presenting to larger audiences

Reactiv SUITE PRO Designed For Personal Devices

Reactiv SUITE PRO is optimized for single users joining a meeting, class, or training session remotely from a Windows 10-based laptop or PC. Excellent for remote workforces and distance learning applications, Reactiv SUITE PRO provides the same functionality and capabilities as Reactiv SUITE for in-office use, but is streamlined to minimize security risks, connectivity options, and to reduce peripheral interoperability issues not found in typical home office environments.

KEY FEATURES

- ▶ Single Windows user edition
- ▶ Easy drawing and document annotation
- ▶ Requires a PC or laptop with touch screen capability

TELL YOUR STORY

Reactiv STAGE is a powerful non-linear storytelling platform that enables teams to shift their focus from managing content to the narrative of a presentation. STAGE allows you to open, render, markup, and present content in any format that you normally use. Simple tools dramatically improve the speed and accuracy of sharing information, capturing audience feedback, and quantifying meeting results.

Open Any File Natively

Open, display, and present Word®, PowerPoint®, Excel®, and PDF documents as well as all types of video and picture files.

Markup and Native Inking

Insert ink natively into many common files, including Microsoft Office documents, as if you were writing on a sheet of paper.

Revision Management

Manage revisions to track and archive changes through automatic saving of new files with date and time stamps.

Manage Additional Displays

Cast content on up to three additional displays for enhanced sharing and collaboration with larger audiences.

Enhanced Video Playback

Open any video, resize it, zoom in or out, and manage playback instantly. Even annotate the video, save scenes, and return to exact frames with a time stamp.

Arrange & Compare

Easily arrange and compare any number of documents, files, and videos side-by-side instantly.

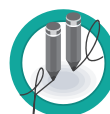

ILLUSTRATE YOUR IDEAS

Reactiv SCRIBBLE is a breakthrough brainstorming and layout tool with an infinite canvas. Powerful markup tools allow multiple users to simultaneously annotate existing documents, track changes, reorder multi-page files, sketch new designs, and create dynamic layouts that accurately represent your vision. SCRIBBLE simplifies complex ideas and visually communicates intent, allowing your team to make better decisions and reduce mistakes.

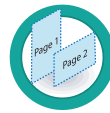

Infinite Canvas

Documents, pictures, videos, and myriad files can be placed on an infinite canvas, reordered and layered with natural writing. Document your ideas and vision without boundaries.

Multi Stylus Support

Up to 10 users can annotate on the same document and contribute ideas simultaneously.

Powerful Pagination

Paginate any section of content and export to PDF format instantly for easy distribution.

Smart Insert

Insert space vertically or horizontally as needed, and move content for a better visual layout.

Smart Rip

Tear out pages from documents or scenes from videos to create a custom layout, timeline, or storyboard.

Edit Any File

Open, annotate, and manipulate Word®, PowerPoint®, Excel®, and PDF documents as well as all types of video and picture files.

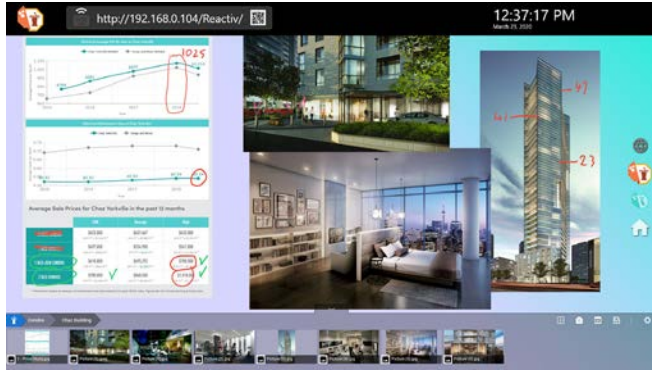

Save 45% of time spent prepping, delivering, and summarizing meeting content while improving message comprehension

TAILORED TO THE WAY YOU WORK

Reactiv **STAGE** is so **simple** that your team doesn't need training, so **powerful** that it handles all of your demanding presentation needs, and so **versatile** it does not matter what type work you do.

SALES

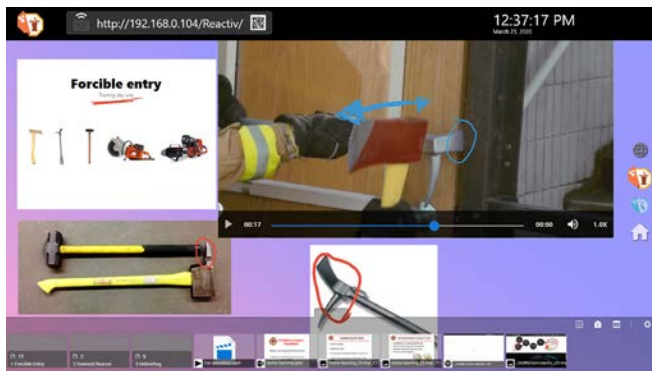

Get a deeper understanding of your customer's needs, and seamlessly present your products and solutions with maximum clarity.

CORPORATE

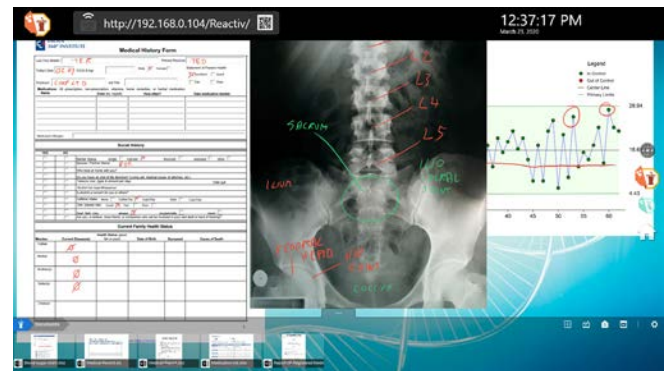

Present ideas, plans, and communicate to large audiences from a podium or in a boardroom with complete control.

TRAINING

Compile and present all your digital files and content seamlessly, remove distractions, and increase participant comprehension.

MEDICAL

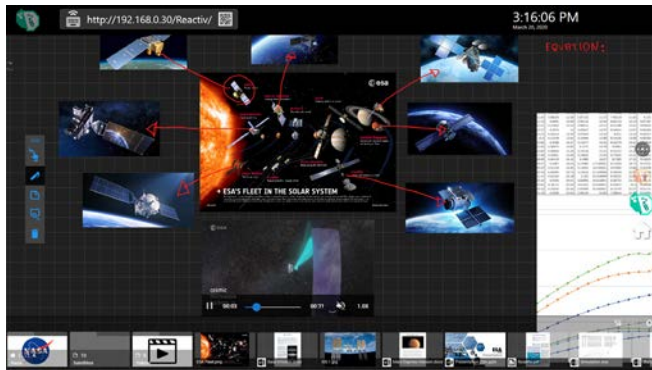

Display and annotate medical images, videos, and test results. Compare patient records from your tablet, laptop, or IFPD.

ADAPTABLE TO THE WAY YOU THINK

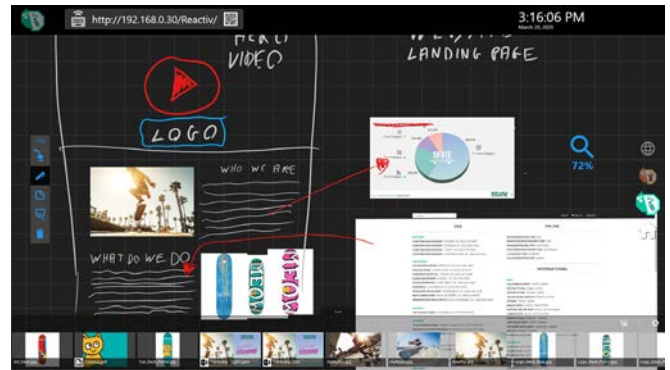

Reactiv **SCRIBBLE** is so **easy to use** that remote users can access and push content around as if it were on paper, so **smart** that it takes brainstorming to the next level, and so **organized** it keeps track of all your workflows and lesson plans.

EDUCATION

Create lesson plans, timelines, or derive complicated formulas, leveraging the infinite canvas of SCRIBBLE to maximize valuable class time.

DESIGN

Ideate complex product schematics, brochure layouts, and website navigation workflows, and then easily track and share the latest versions.
